Introduction: to sub-contract logistics

Europe is a huge growth potential for companies with an international focus. The European Union counts 27 member states, with about 500 million residents with relatively high means of purchasing. Europe is one of the biggest consumer markets in the world. You want your company to enter Europe and you are looking for a reliable partner for your logistics. Make a strategical choice: select a logistics company based in the Netherlands.

The Netherlands provides a strategic location to serve markets within Europe, the Middle East and Africa. Many international companies use The Netherlands as location for their European supply chain operations; as point of entry into the EU market for intercontinental freight by sea and air, or as location for central-, bulk- or regional distribution centers.

Give logistics the attention it deserves and spend your time on the core business of your company!

Advantages the Netherlands

The Netherlands is well-known for its expertise in the international trade and excellent transport and logistics. Therefore, the Netherlands is the logistical entry port to the European market. Many international companies use Dutch partners to distribute their goods in Europe.

- ✓ *Central location to European market*
- ✓ *Excellent ports and airports*
- ✓ *Extensive infrastructure*
- ✓ *Favorable Tax Environment*

Central location to European market

The Netherlands is the logistics gateway to the European market. It is located in the heart of Europe's largest consumer markets, amidst the metropolitan areas of London, Paris, Amsterdam and Brussels, and at a stone's throw distance from major e-commerce markets such as UK, Germany and France. These countries are respectively on place 3, 5 and 6 of the top-10 largest e-commerce countries worldwide.

Due to its well-developed infrastructure, and the large supply of transportation services, The Netherlands offers excellent connections to all these markets via every mode of transport available. This makes The Netherlands ideal for serving your European customers. From The Netherlands your company can reach clients in the major European markets within 24 hours, using an express service, or within days, using a more economical groupage transport network.

Excellent ports and airports

There are 15 seaports in the Netherlands with regular international connections, including one of the two main European ports: Rotterdam. There are four international airports, the most important: Amsterdam Airport Schiphol.

Extensive infrastructure

135,470 km roads, of which 2,360 km highways. There are almost no toll roads, and the speed limit is 120 or 130 km/hour on the highways. 2,809 km railways, of which more than two-thirds is electrified. Moreover, there are 5,046 km waterways, of which over 75% are canals.

Favorable Tax Environment

Another reason why many companies choose the Netherlands as a location for their European logistics is that the Dutch Customs authorities are well known for their practical and pro-active approach towards facilitating international trade and customs procedures.

The Dutch Customs offers a special service to international companies that are interested in the Netherlands as location for their European supply chain operations.

- ✓ Proactive attitude of customs authorities
- ✓ Experienced and specialized Customs and Tax officers
- ✓ No actual payment of VAT

Since international trade contributes significantly to the Dutch economy, the government works hard to maintain an attractive business climate for companies operating on an international level. It aims to facilitate business activities via the Netherlands through cooperation and flexibility, as well as streamlined and efficient customs procedures, making the Netherlands an ideal location for pan-European supply chain activities.

The Dutch Customs Department understands that in supply chain management timing is everything. Therefore, in order to speed up the process and to avoid unnecessary delays, customs procedures are nowadays computerized. In order to accelerate the selection and inspection process, pre-arrival information is supplied electronically to the Customs Department, before arrival of a shipment in the EU. This way, Customs can inform the parties involved, at the earliest possible stage, if a consignment will be checked upon arrival.

In contrast to most other EU member states, the Netherlands has a system that provides for the deferment of VAT at the time of import. Instead of paying VAT when the goods are imported into free circulation within the EU, the payment can be deferred to a periodic VAT return. Under this system, the VAT at import should be declared but the amount can be deducted on the same return. The bottom line is that there is no actual payment of VAT at import, so that companies can realize cash-flow and interest earning benefits.

Logistics from Rijen

TLogistics is established in Rijen, near Tilburg. An excellent location in the heart of Europe's largest consumer markets and at a stone's throw distance from other major markets.

TLogistics is one of the few LSP's located in the very heart of the Benelux only 100 miles from the two main European ports, Rotterdam and Antwerp. Also close to international airports in Amsterdam, Brussels and Düsseldorf. It is safe to say that we are well positioned in the logistics hotspot of The Netherlands which will allow a huge amount of flexibility with regards to staff and footprint!

Location Rijen

- ✓ Warehouse with 3,00 square meters / 32,000 sq ft
- ✓ Suitable for small to average size companies
- ✓ BORG 4 security level
- ✓ Conditioned areas with controlled temperature
- ✓ Separate areas for Value Added Logistics (VAL) such as wrapping, packaging or bundling, labeling or pricing and re-conditioning.

Select TLogistics

Europe is complicated. But TLogistics provides order. We are very familiar with the logistical possibilities within the continent and take care of your complete logistics with a no-nonsense attitude. Due to our knowledge, expertise and experience your company will be ready in no time to reach customers within the whole of Europe and outside it.

Many international companies struggle to find a logistics service provider that matched their culture and that has knowledge of the logistics service provision with Europe at the highest level. TLogistics has been the logistics service provider you are looking. We offer customized solutions and provide you with expert advice. TLogistics is your fulfilment specialist. We take care of the logistics process from A to Z and we have set up this process based on speed, efficiency and your requirements. Both business-to-consumer (B2C) as business-to-business (B2B) shipments are in safe hands with us. From our organized warehouse we provide service to your (global) market, both B2B as B2C.

We are your logistical one stop shop in Europa!

Quality is not necessarily expensive

The main focus of TLogistics is the supply of high quality logistics solutions against competitive tariffs. Quality is not necessarily expensive. Moreover: because of our contacts with leading pallet carriers you will benefit from our cheap tariffs and you will no longer have your own storage charges.

At TLogistics we do not make matters more difficult and you can rely on a personal and professional processing of your logistic processes. Operational result counts. From receipt to shipment: your logistics processes are in safe hands with our enthusiastic team. You can rely on us that your package is wrapped carefully and the correct products are neatly packed. As we manually pack each order, we can provide your products with your personal touch.

Fiscal Rep BV

If you want to import goods to the Netherlands, sell these here or if you want to export products to non EU-countries, a fiscal representative from Fiscal Rep BV will take care of much of the work for you.

Your fiscal representative organizes for you

- ✓ The VAT declaration, including the payment of the VAT and refund requests
- ✓ The declaration of intra-community performances for supplies and services
- ✓ The statistical declaration to the 'Centraal Bureau voor de Statistiek' (Central Registry Office for Statistics)
- ✓ To apply reverse charge procedure on imports (fiscal representative is obliged)

With the reverse charge procedure, you can suspend the VAT at import till the VAT declaration. The VAT at import does not have to be paid when importing the goods. The VAT at import will be paid administratively on the VAT declaration and the deduction will be settled as pretax. As a foreign entrepreneur you are not able to get such a suspension license and therefore you should appoint a fiscal representative.

Fiscal Rep B.V. specializes in developing VAT, customs and administrative solutions for companies who trade or want to trade in the EU and require a proper and compliant setup of their logistical processes relating to EU customs and VAT. Fiscal Rep BV was founded in June 2010. The founders have a combined experience of more than 30 years in handling logistics, customs and VAT matters in the EU. Fiscal Rep B.V. therefore has a strong background in customs and VAT Compliance.

The cooperation between TLogistics and Fiscal Rep has been very successful from the beginning in 2012. All of the TLogistics customers that require Fiscal Representation are being represented by Fiscal Rep and over the years we have been able to seamlessly integrate our processes so you as a customer will hardly notice that you are actually dealing with two different companies.

IT-System

TLogistics is not just a logistics service provider. Because of our advanced system we offer you crucial system solutions, such as a complete 'end-to-end' traceability of your orders and products. You can rely on accurate stock and order management. Supported by our professional and user-friendly system we control the complex processes of the current (web shop) logistics and we offer you real-time insight into your product stock.

One stop shop

TLogistics is capable to take over the complete logistics process of your company. We take care of the transport from your supplier and we receive the shipment, we check all these for relevant specifications and ensure for storage in our organized warehouse. Our expert employees will manually pack each order. Subsequently the package is delivered to your customer through the most appropriate carrier. All services regarding the delivery, such as repeat offering, will be carried out by us. This also applies for return shipments and re-conditioning of products. Apart from storage and order fulfilment, TLogistics is also the right address for the shipment of a parcel, pallet or container within or outside Europe.

We are your service provider for all your logistical wishes and requirements.
